### Contents

- **1 8.5.002.00**
  - 1.1 Helpful Links
  - 1.2 What's New
  - 1.3 Resolved Issues
  - 1.4 Upgrade Notes

## What's New

This release contains the following new features and enhancements:

- This release is compatible with Genesys Co-browse WDE Plug-in release 8.5.001.09.
- Starting with this version, Genesys Co-browse has extended monitoring functionality:
  - New Logging reporter allows you to report metric values in the console or in a log file.
  - Co-browse Server can now generate monitoring alarms that allow you to improve Co-browse performance.
- The agent browser is now the only one to use the cluster URL. The consumer's browser always uses the URL in the JS instrumentation for css-proxy and url-proxy.

## Resolved Issues

This release contains the following resolved issues:

---

Co-browse now synchronizes interactive form fields, such as autocomplete, more reliably. (CB-3344)

---

Co-browse now more reliably synchronizes complex interactive changes such as animations and AJAX-based page updates. (CB-3334)

---

## Upgrade Notes

No special procedure is required to upgrade to release 8.5.002.00.
